

Niloé™

Getting it just right

Traditional and wireless ZigBee® solution

Just right...

for the environment and for you

Eco design

- › laser marking reduction
- › packaging optimization
- › packaging and dust protection recycled materials
- › the Niloé™ range is manufactured in ISO 14001 certified plants. Constant attention is paid to the environmental impact of each single activity

Plastic protection cover (APET): 100% recycled and recyclable material*

Lower energy consumption during manufacturing: reduction of laser markings

Indications obtained directly from the plastic mould

* unless soiled plastic

Eco design

The Eco design helps reducing environmental impact during every stage of the product lifecycle.

Eco solutions

Eco solutions bring reductions in energy consumption levels, minimising the energy impact of buildings and houses.

Less installation time

Simple and effective to install, Niloé™ ensures installation efficiency!

LED ILLUMINATION
instead of incandescent light, for lower consumption

ZigBee® RADIO CONTROLS
for less use of wires

PROTECTION AGAINST DRAUGHT
improves the performance of the heating and air conditioning systems

TEMPERATURE CONTROL
heating only when and where needed

Flexible and adaptable

for perfect installation also on uneven walls

Plastic support frame

› as strong as a metal support frame

› flexible

› uneven wall installation

› insulated

› installation becomes easier and simpler

CLAWS

- › quick, easy, reliable
- › strong setting
- › suitable for all kind of boxes
- › insulated

The claws are easy to set/unset on the support frame

setting regulation

hooking slot

Cover plates with gradual hooking system

- › 4 fixing points
- › firmly fixed to the support frame
- › new fitting technique: perfect adhesion, even on uneven walls or after decoration (painting, wallpaper)
- › can be permanently installed at the end of the works, without removing the cover

MULTIGANGS

- › the support frames can be perfectly and easily joined for multi-gang installation

Easy and cost-effective to cut installation steps by half

French standard

1. fix the device
without removing the
protection cover

Just two steps....

German standard

.....rather than four with Suno or Cariva !

Remove the cover plate and the rocker cover

Fix the device

Fit the cover plate

2. remove the protection cover and complete the work by fitting the cover plate!

French standard

German standard

The cover plate can be removed and then replaced without removing the rocker cover.

4.

Fit the rocker cover by screwing

Protection cover

for the protection of the device

A useful protection, in recyclable plastic material

- › to use throughout all the processing stages
- › easy to remove before fitting the cover plate at the end of the work
- › to guarantee, on delivery, an excellent work

The protection cover is an integral part of the device and protects it from dust, paint and scratches, even after installation.

If the product is used before installing the cover plate, removing the protection cover is not necessary.

Permeability sock

to save energy

Specific protection device against draughts

- › quick to install
- › less heat dispersion
- › reduced heating and cooling system costs

The «permeability sock» prevents the dispersion of heat due to draughts inside the pipes of the electric system.

Fit the protection on the device

Insert the cables in the appropriate holes on the back of the protection and connect them to the device

Fix the mechanism to the box with screws or claws

Note: IP44 devices are delivered with permeability sock

Wireless

to save installation time

ZigBee®
(Radio control technology)
less cable needed and
more flexibility

- › reduced installation time
- › more controls in the same room
- › on customer's demand, the controls may be installed in any position

CONTROL DEVICE

Wireless

ZigBee® certified product: manufactured specific profile

SWITCH

To be connected to the load

Example of ZigBee® installation

Shutter control

* Switches (connected to the shutter motor): manage the local shutter and receive the signal from the radio control ** Radio control for centralized management of a group of shutters ▲

▼ *Switches (connected to the load): directly turn the lamp on and off and receive the commands from radio controls ** Radio control: turn the lamp on and off

Lighting control

CONFIGURATION:
Easy and fast

Directly on the product, using the Push and Learn procedure.

When to use it

- › for less complex, new installations
- › to turn traditional electric installations into home automation systems
- › updating of the electrical installation without the need for masonry work

Timeless design

an essential but complete 4 colour range

COVER PLATE

Harmonious design for a light and modern look

DEVICE COLOURS:

White or ivory glossy finish, to dress with a cover plate in the preferred colour

white / white

red / white

taupe / white

ivory / ivory

red / ivory
